

VICTAULIC

# Fire Protection Systems

More than 80 years of piping systems solutions

Victaulic® innovation began in 1925 with the first grooved-end mechanical pipe joining technology. In 1952, Victaulic released the first approved coupling for fire protection services. Today, Victaulic technology includes a complete offering of sprinklers, couplings, fittings, valves, accessories and tools to meet the needs of any fire protection application.

Every person at Victaulic is dedicated to providing the most innovative technologies and the fastest, most dedicated service in the industry to ensure product is available where and when you need it.

## Innovation

Built into every FireLock® system are innovative features aimed to optimize system design and shorten installation hours. As an example, the FireLock EZ™ coupling eliminates loose parts which results in faster installation times.

### Productivity

The Victaulic brand is synonymous with mechanical piping innovation. Innovation that provides better performance, easier installations, and a product line that is unmatched in the industry.

The result? You work smarter and more productively while delivering the reliability and performance your customers demand.

### Efficiency

Ask your local sales representative about the many ways you can save time and resources by specifying genuine FireLock products for your system, from couplings to sprinklers to valves. Or by making use of some of our tools and accessories to help simplify your scheduled maintenance calls and service checks.

By specifying and installing Victaulic FireLock systems, your business is poised to become more profitable. Our labor-saving innovations and on-site project assistance combine to help your crew work more efficiently.

Piping. Systems. Solutions.

## Global Solutions

A world of applications at work

### **Our solutions are truly global.**

Victaulic piping systems solutions are found in some of the world's most stunning and challenging engineering projects – buildings that arguably “push the design and construction envelope.”

### **Custom solutions for demanding challenges**

Whether new construction or retrofit, Victaulic delivers a level of versatility unmatched in mechanical piping systems technology for today's engineering marvels.

Victaulic solutions provide superior design flexibility, the ability to accommodate seismic moments, noise and vibration attenuation, system access, system scalability, installation-friendly products and service, and more.

### **Projects spanning the globe**

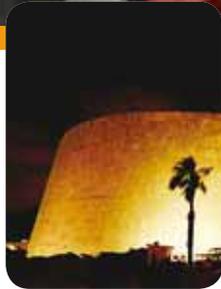

The projects illustrated here are just a few of the many buildings around the world for which Victaulic has provided innovative piping solutions.

For additional information on these and many other projects around the world, please visit

# Typical System Solutions\*

## Fire Protection Systems Solutions

Use this convenient guide to select the Victaulic product or system solution most appropriate for your next fire protection project.

We have selected a few building types for which Victaulic fire protection products are typically specified. Not all are listed here. Consult your Victaulic sales representative for additional information.

BUILDING TYPE	RESIDENTIAL MULTI-STORY	PARKING GARAGE
<b>System Goal</b>	Life safety	Property protection
<b>Considerations</b>	Need maximum coverage in multi-floor, multi-unit living space	Multi-level structure that is prone to freezing and exposed to flammable fuels in automobiles
<b>Recommended coupling/fitting piping system</b>	FireLock couplings, fittings, and valves	FireLock couplings, fittings, and valves
<b>Recommended device type</b>	Series 751 alarm valves, Series 717/717R check valves	FireLock NXT Series 768 dry valves@
<b>Recommended sprinkler type</b>	Quick response commercial and residential recessed pendent and horizontal sidewall sprinklers	Upright extended coverage, ordinary hazard (ECOH)
<b>Recommended sprinkler finishes/coatings</b>	White, chrome, or custom-painted	Brass or proprietary nickel/Teflon ‡

\* This solutions guide is a representative example of typical Victaulic fire protection applications.

@ In areas that do not experience freezing conditions the Series 751 alarm valves can be used.

INDUSTRIAL PLANT	MUSEUM	WAREHOUSE STORAGE (UNHEATED)	RESIDENTIAL (SINGLE FAMILY)
Provide maximum coverage to suppress fires quickly, eliminate risk of catastrophic event	Protect scientifically or historically significant artifacts, paintings, etc.	Provide maximum protection in large storage areas	Provide maximum protection for personal safety
Presence of multiple types of flammables	Archival areas need special care, minimize risk of damage to property	Freezing temperatures in unheated spaces, tall ceilings, high flows at low pressure required	Install system that accommodates low water pressure and pleasing aesthetics
FireLock couplings, fittings, and valves	FireLock couplings, fittings, and valves	FireLock couplings, fittings, and valves	FireLock couplings, fittings, and valves
FireLock NXT Series 769 deluge valves	FireLock NXT Series 769 preaction valves	FireLock NXT Series 768 dry valves	FireLock Series 717/717R check valves
Open Spray, Deluge	Quick response, recessed or concealed pendent	LP-46 low pressure pendent and upright, ESFR pendent, horizontal sidewall, upright or intermediate	Residential recessed pendent, sidewall or concealed pendent
Brass or nickel/Teflon <sup>†</sup>	Brass, chrome, or custom-painted cover plate	Brass or nickel/Teflon <sup>‡</sup> plate	White, chrome, or custom-painted

<sup>†</sup> Teflon is a registered trademark of Dupont Corporation.

# Fire Protection Innovations

## A constant flow of innovation since 1925

Founded in 1925 on the basis of marketing a single product called the “Victory Joint,” the Victaulic name comes from joining the words “victory” and “hydraulics” together. Used in World War I to provide fuel and water to the front, Victaulic products have evolved into the most innovative systems for joining pipe.

# 1925

# 1950

**1925** Introduced grooved end pipe joining to the U.S.

1926

1927

1928

1929

**1930** AWWA products introduced for underground services

1931

1932

1933

1934 Grooving changed the entire piping industry by creating a quick and easy method to assemble pipe joints. Pipe could be quickly cut-grooved and then securely connected with Victaulic couplings. The savings in time and labor would lead to dramatic gains in productivity.

1935

1936

1937

1938

1939

1940

1941

1942

1943

1944

1945

**1946** Vic-Groover® cut grooving tools and Style 99 Roust-A-Bout® plain end coupling introduced

1947

1948

1949

1950

1951

**1952** First grooved-end coupling to achieve UL listing

1953

1954

1955

1956

**1957** Introduced roll grooving to the industry

1958

1959

**1962** Introduced first production roll groover

1963

**1964** FlushSeal® gasket developed for dry systems

1965

**1966** First adjustable field cut grooving tool

1967

1968

**1969** First outlet coupling and first direct flanged-to-grooved adapter

1970

1971

**1972** Pioneered & achieved UL Approval of roll grooving for 0.188 lightwall pipe

1973

**1974** First grooved coupling for reducing on-the-run connections

**ROLL GROOVING GREATLY REDUCES GROOVING TIMES**

The hallmark of Victaulic product development is finding faster, easier and better ways to join pipe, and in the 1950's, it led to one of the most significant concepts the company ever developed – roll grooving. By introducing this patented solution, Victaulic brought the efficiencies of the grooved coupling out of the realm of heavy wall pipe and into the lighter wall and smaller diameters used in such vital applications as fire protection.

1957

1975

**1975** First bolted mechanical branch connection; Vic hole cutting tool; Vic-Check check valve

1976  
1977

Introduced FIT – First locking lug assembly system for small diameter pipe, no threading needed

**1978** Vic-Tap – First positive location, full port hot tapping device with UL Listing

1979  
1980  
1981  
1982

**1983** Zero-Flex, the first rigid grooved coupling, using angle-pad design

1984

**1985** Series 718/719 TestMaster – First alarm test module combining 24 field assembled parts into one factory assembled unit

**1986** First rubber coated disc butterfly valve with grooved ends designed specifically for fire protection

1987

**1988** Style 005 FireLock coupling – First rigid grooved end coupling designed specifically for fire protection services

1989

**1990** FireLock Fittings – First CAD designed, high flow efficiency, short radius grooved end fittings for fire protection

1991

**1991** Pressfit System – First IPS imperial size pressed fitting system

1992

**1993** In-place roll groover for grooving previously installed pipe; Portable, easy set-up, retrofit hole cutting tool

1994

**1994** 717 FireLock Check Valve – First extended body swing; check design, grooved end check valve for fire protection

Introduced 717-R FireLock Check, with a riser kit

Enhanced tracking rolls for "hands off" grooving

1995

1995  
1996  
1997

**1998** FireLock line of devices – engineered to be the lightest, most compact devices designed to date

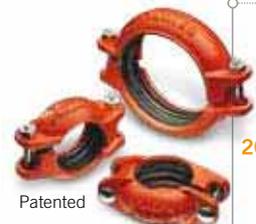

**1999** FireLock line of automatic sprinklers

2000  
2001  
2002

**2003** Introduced V36 dry fire sprinklers with UL listing

2004

Patented

**FIRELOCK EZ COUPLING**

Introduced FireLock EZ – first rigid coupling designed as a lightweight, installation ready coupling with no loose parts

**2005**

2005

**FIRELOCK NXT**

Introduced FireLock NXT valve line with a single set point for all dry, deluge and preaction services

**2006**

2006

**2007** Expanded FireLock NXT product line with Series 7C7 compressor package

**2008** Introduced LP-46 Low-Pressure Storage Pendent Sprinkler

2009

# Design Data

## Introduction

This Victaulic Fire Protection Catalog provides general information on mechanical piping methods and Victaulic products for fire protection systems. For the latest and most up-to-date information, always consult the individual product submittals provided on the Victaulic web site. This catalog is organized to provide information in the context and form most readily usable. For easy identification of major sections of interest, see the condensed table of contents on pg. 1-1, for a fully detailed index, see pg. 11-1. For more detailed design guidelines, consult Design Data, Publication 26.01.

## Important Information

Victaulic has developed, in over 80 years in mechanical piping, variations of piping practice for use on a wide variety of piping materials.

Victaulic standard grooved pipe couplings are designed for use with pipe grooved to meet Victaulic groove specifications and Victaulic grooved end fittings, valves, and related grooved end components only. They are not intended for use with plain end pipe and/or fittings. Victaulic plain end couplings are designed for use only with plain end or beveled end steel pipe (unless otherwise indicated) and Victaulic plain end fittings. **Victaulic plain end couplings must not be used with grooved end threaded pipe and/or fittings.**

Pipe must be prepared to meet Victaulic specifications outlined for each specific product style. Performance data listed herein is based on proper pipe preparation. The proper gasket must be selected for the service intended. **It should be noted that there are various services for which Victaulic gaskets are not recommended. Reference should always be made to the latest Victaulic Gasket Selection Guide (request publication 05.01) for specific gasket service recommendations and for a listing of services which are not recommended. Gaskets for Victaulic products always must be lubricated for proper assembly.** Gasket lubricant must meet manufacturer's specifications. Thorough lubrication of the gasket exterior, when required, including the lips and/or pipe ends and housing interiors, is essential to prevent gasket pinching. Lubrication assists proper gasket seating and alignment during installation.

Victaulic FireLock devices require proper set up and maintenance. Always refer to the latest manual included with each valve for details.

When installing Victaulic FireLock automatic sprinklers it is important to select the proper wrench for installation. A complete guide for proper installation of Victaulic automatic sprinklers is available by requesting publication I-40.

Victaulic has a complete line of tools for preparing pipe to Victaulic specifications. Use of these tools is recommended in preparing pipe to receive Victaulic products. Always read and understand the Tool Operating Instructions supplied with every Victaulic tool prior to using any tools. All data contained herein, is subject to change without notice.

All rights reserved. No part of this Victaulic catalog may be reproduced, stored in a retrieval system, or transmitted, in any form or by any means, electronic, mechanical, photocopy, recording or otherwise, without the prior written permission of Victaulic.

## Notice

The technical and performance data, weights, dimensions and specifications published are current as of the date of publication. For the most up-to-date information visit the Victaulic web site for detailed specific product submittal information.

Victaulic maintains a policy of continual product improvement and, therefore, reserves the right to change product specifications, designs, and standard equipment without notice and without incurring obligation.

For the most up-to-date Victaulic product information, please visit [www.victaulic.com](http://www.victaulic.com).

The material presented in this catalog is intended for piping design reference in utilization of Victaulic products for their intended application. It is not intended as a substitute for competent, professional assistance which is an obvious requisite to any specific application.

## Design

Reference should always be made to design information available at no charge on request from Victaulic. Good piping practices should always prevail. Specific pressures, temperatures, external or internal loads, performance standards and tolerances must never be exceeded. Many applications require recognition of special conditions, code requirements and use of safety factors. Qualified engineers must make these decisions.

**While every effort has been made to ensure its accuracy, Victaulic, its subsidiaries and affiliated companies, make no express or implied warranty of any kind respecting the information contained in this catalog or the material referred to herein.**

**Anyone making use of the information or material contained herein does so at their own risk and assumes any and all liability resulting from such use.**

## Installation

Reference should always be made to the specific Victaulic Field Installation Handbook for the product you are installing. The following is a list of handbooks that can be requested for free from Victaulic:

- I-40 FireLock Automatic Sprinklers
- I-100 General Handbook
- I-300 AWWA Product Handbook
- I-500 Pressfit System Handbook
- I-600 Copper Products Handbook
- I-751 FireLock Alarm Valve Manual
- I-759 FireLock Alarm Valve Manual
- I-768 FireLock NXT Dry Valve Manual
- I-769D FireLock NXT Deluge Valve Manual
- I-769P FireLock NXT Preaction Valve Manual
- I-900 HDPE Products Handbook

Handbooks are included with each shipment of Victaulic products for complete installation and assembly data, and are available in PDF format on our website at [www.victaulic.com](http://www.victaulic.com).

# Design Data

## Global Pipe Size Designations

Victaulic product data is utilized worldwide and all technical data is shown in both imperial (U.S.) and metric terms. The following chart shows a comparison between typical metric and IPS pipe sizes.

Imperial Inches – Size Group	Outside Diameter mm/Spec Ref	DIN mm	JIS mm	ANSI inches	China Standard (GB) mm
1/2	21.3 mm	15	15 A/21.7 mm	1/2	15*/21.3 mm
3/4	26.7 mm	20/26.9 mm	20 A/27.2 mm	3/4	20*/26.9 mm
1	33.4 mm	25/33.7 mm	25 A/34 mm	1	25*/33.7 mm
1 1/4	42.2 mm	32/42.4 mm	32 A/42.7 mm	1 1/4	32*/42.4 mm
1 1/2	48.3 mm	40	40 A/48.6 mm	1 1/2	40*/48.3 mm
2	60.3 mm	DN & ISO 50	50 A/60.5 mm	2	50*/60.3 mm
2 1/2	73.1 mm	—	—	2 1/2	—
3	76.1 mm DIN/ISO (3 OD)	DN & ISO 65	65 A/76.3 mm	—	65*/76.1 mm
	88.9 mm	DN & ISO 80	JIS 80 A	3	80*/88.9 mm
4	108 mm China and old DIN	DIN 108 mm	—	—	108 mm
	114.3 mm	DN & ISO 100	JIS 100 A	4	100*/114.3 mm
5	133 mm China and old DIN	DIN 133 mm	—	—	133 mm
	139.7 mm DIN/ISO (5.5 OD)	DN & ISO 125	125 A/139.8 mm	—	125*/139.7 mm
	141.3 mm	—	—	5	—
6	159 mm China and old DIN	DIN 159 mm	—	—	159 mm
	165.1 mm JIS (6.5 OD)	—	150 A/165.2 mm	—	—
	168.3 mm	DN & ISO 150	—	6	150*/168.3 mm
8	216.3 JIS	—	JIS 200 A	—	—
	219.1 mm	DN 200	—	8	219.1 mm
10	267.4 JIS	—	JIS 250 A	—	—
	273 mm	DN 250	—	10	273 mm
12	318.5 JIS	—	JIS 300 A	—	—
	323.9 mm	DN 300	—	12	323.9 mm

### IMPORTANT NOTE:

Nominal designations are used where the actual OD of the pipe matches the ANSI size. Otherwise both the nominal and actual OD are listed. China sizes are listed as actual OD in mm. China sizes in orange are tubing sizes.

\* Nominal sizes for China standard pipe.

# Couplings

- Victaulic, the originator and innovator of grooved coupling technology, offers a variety of coupling sizes and styles for fire protection piping systems
- Victaulic developed the first UL Listed coupling in 1952 and continues to develop products that allow for faster and easier joining of pipe
- New product development continued with the introduction of the Style 009 FireLock EZ coupling—this installation ready, patented coupling eliminates the need for disassembling and reassembling components during installation

## Reducing Coupling

STYLE 750, PG. 3-8

### GENERAL NOTES:

**Working Pressure** and **End Load** are total, from all internal and external loads, based on standard weight steel pipe, standard **roll** or **cut** grooved in accordance with Victaulic specifications. Contact Victaulic for performance on other pipe.

**Warning: For one time field test only**, the Maximum Joint Working Pressure may be increased to 1½ times the figures shown. **For specific pressure ratings by product, consult the individual product submittal publications.**

**Allowable Pipe End Separation** and **Deflection** figures show the maximum nominal range of movement available at each joint for standard **roll** grooved pipe. Figures for standard **cut** grooved pipe may be doubled. These figures are maximums; for design and installation purposes these figures should be reduced by: 50% for ¾ – 3½"/20 – 90 mm; 25% for 4"/100 mm and larger.

† The allowable pipe end separation dimension shown is for system layout purposes only. FireLock EZ couplings are considered rigid connections and will not accommodate expansion or contraction of the piping system.

\* Refer to General Notes on pg. 3-1.

#### IMPORTANT NOTES:

When assembling FireLock EZ couplings onto end caps, take additional care to make certain the end cap is fully seated against the gasket end stop. For FireLock EZ Style 009/009V couplings, use FireLock No. 006 end caps containing the "EZ" marking on the inside face or No. 60 end caps containing the "QV EZ" marking on the inside face. Non-Victaulic end cap products should not be used with Style 009/009V couplings.

PRE-ASSEMBLED

INSTALLED

- Provides rigidity; does not accommodate expansion, contraction or angular deflection
- Installation-ready design – assemble a joint without disassembling the bolts, nuts, gasket and housings
- For use in fire protection systems only
- Reduces installation time up to 60%
- Available with hot dipped galvanized finish
- Proprietary gasket design
- Rated up to 300 psi/2065 kPa - see submittal publication 10.60 for complete performance ratings
- Sizes from 1 1/4 – 4" / 32 – 100 mm

# Couplings

## FireLock Rigid Coupling

### STYLE 005

For Complete Information Request Publication 10.02

- Unique angle-pad design for rigidity
- Allows supporting/hanging same as welded or threaded in accordance with NFPA-13 requirements
- For use in fire protection services only
- Available with hot dipped galvanized finish
- Pressure rated up to 350 psi/2410 kPa
- Sizes from 1¼–8"/32–200mm

FireLock Flange Adapter  
ANSI Class 150  
PN10  
JIS 10K

STYLE 744

For Complete Information  
Request Publication 10.04

- Directly incorporates ANSI Class 150, PN10, JIS 10K or ANSI Class 300, PN16, JIS 20K bolt hole patterns into a grooved system
- Hinged for easy handling with integral end tabs which facilitate assembly
- Small teeth inside the key shoulder inside diameter prevent rotation
- Pressure rated up to 175psi/1200kPa
- Sizes from 2–8"/50–200mm

Size		Max. Work Pressure *	Max. End Load *	Sealing Surface		Dimensions		Approx. Wgt. Each

\* Working Pressure and End Load are total, from all internal and external loads, based on standard weight steel pipe, standard **roll** or **cut** grooved in accordance with Victaulic specification. Contact Victaulic for performance on other pipe.

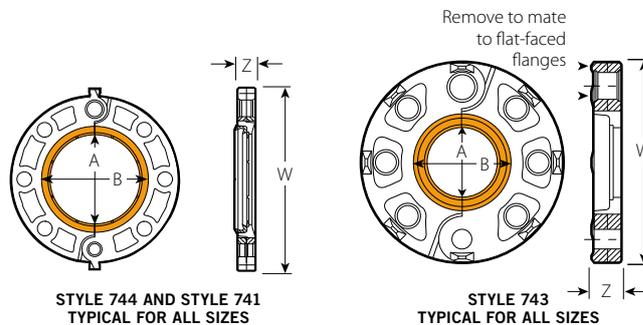

### IMPORTANT NOTES

WARNING: For one time field test only, the Maximum Joint Working Pressure may be increased to 1½ times the figures shown.

Style 744 FireLock Flange adapters provide rigid joints when used on pipe with standard roll or cut groove dimensions and consequently allow no linear or angular movement at the joint.

WARNING: Depressurize and drain the piping system before attempting to install, remove, or adjust any Victaulic piping products.

Style 744 FireLock flange adapters provide rigid joints when used on pipe with standard cut or roll groove dimensions and consequently allow no linear or angular movement at the joint. When used with Victaulic Series 765/705W/707 butterfly valves, plastic pipe or lightwall metallic pipe, small teeth in inside diameter of key section should be removed and may be used on one side of the valve.

Orange area of mating face must be free from gouges, undulations or deformities of any type for effective sealing.

#### IMPORTANT NOTES:

Style 743 Vic-Flange must be ordered as a factory assembly when connected to a Victaulic fitting or valve. Contact Victaulic for details. Total bolts required to be supplied by installer, may be ordered from Victaulic.

For restrictions on where and how Vic-Flange adapters and flange washers can be used, refer to Publication 06.06.

# Couplings

## Outlet Coupling

### STYLE 72

For Complete Information  
Request Publication **06.10**

- Serves dual purpose as a coupling and outlet
- Designed to seal on the joined pipe ends and in the neck of the outlet
- Outlet can be prepared for grooved, female threaded or male threaded connections
- Pressure rated up to 500 psi/3450 kPa
- Sizes from 1½ × ½"/40 × 15 mm through 6 × 2"/150 × 50 mm

\* Refer to General Notes on pg.3-1.

#### IMPORTANT NOTES:

Complete coupling includes one-piece hinged housing, gasket and locking pin only. Assembly tool Style 792 is required for assembly (one tool fits all size couplings).

# Fittings

## FIRELOCK FITTINGS

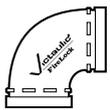

- CAD-developed, hydrodynamic design that has a shorter center-to-end dimension than standard fittings
- A noticeable bulge allows the water to make a smoother turn to maintain similar flow characteristics as standard full flow fittings
- Pressure ratings conform to the ratings of Victaulic FireLock Style 005 and Style 009 couplings

## STANDARD FITTINGS

- Standard fittings conform to Style 77 coupling ratings

Additional fitting configurations available, contact Victaulic for details.

(sw) segmentally welded steel.

\* See individual fitting submittals for approvals.

### IMPORTANT NOTES:

No. 60 cap is not suitable for use in vacuum service with Style 009, Style 72 or 750 couplings.

No. 61 bull plugs should be used, request Publication 07.01 for more information.

# Hole Cut Piping System

- In 1969, Victaulic developed the first outlet coupling and first direct flanged-to-grooved adapter
- Gaskets are molded to conform to the outside diameter of the pipe and are of a pressure responsive design
- Victaulic hole cut products are mounted to the pipe using either a locating collar (Style 920 and 920N) or a toe and heel (Style 923), and provide a smooth flow area
- For complete information request publication **11.01**

## Hole Cutting Tools

Cut fast, accurate mid-pipe holes up to 4½"/108mm with Victaulic hole cutting tools, see pg. 10-6.

GROOVED OUTLET

FEMALE THREADED OUTLET

- Provide a direct branch connection at any location where a hole can be cut in the pipe
- A pressure responsive gasket provides the seal
- Pressure rated up to 400 psi/2750 kPa
- Sizes from 2 × ½"/50 × 15 mm through 8 × 4"/200 × 100 mm

\*\* Center of run to engaged pipe end, female threaded outlet only (dimensions approximate).

† Available with grooved or female threaded outlet. Specify choice on order.

‡ Center of run to end of fitting.

# Female threaded outlets are available to NPT and BSPT specifications.

@ These pressure ratings are general guidelines. Please consult Publication 10.01 for specific pressure ratings by type of pipe and regulatory agency.

(a) British Standard female pipe threaded outlet is available as listed. Specify "BSPT" clearly on order.

(b) For 76.1 mm threaded outlet, specify 2 1/2" BSPT clearly on order.

§ VdS approved for fire protection services. Consult publication 10.01 for additional information.

‡ LPCB approved for fire protection services. Consult publication 10.01 for additional information.

\* Approved for use in China by Tianjin Approvals Company.

## Victaulic Innovations

Since 1952, when Victaulic received the first UL approval for a grooved coupling, our continuing mission is to find faster and easier ways to join fire protection systems.

A typical example of this effort is the TestMaster alarm module. Before the TestMaster was developed, test and drain loops consisted of 24 individual pieces that all had to be joined. The TestMaster alarm module reduced this to one-piece and two joints, greatly reducing the time and physical space needed for test and drain loop assemblies.

#### IMPORTANT NOTES

To prevent rotation of valves, it is recommended that Series 705 be installed with Victaulic Style 07 Zero-Flex, Style 005 FireLock, Style 009 FireLock EZ or Style HP-70 rigid couplings. If Victaulic flexible couplings are used, additional support may be required.

Valve **must not** be installed with disc in full open position. Disc must be partly closed so that no part is protruding beyond end of valve body.

Victaulic grooved end butterfly valves are permitted for use with grooved end pipe (IPS) only. Not permitted for use with plain end (IPS) pipe.

Series 705 valves are designed for ambient weather conditions as opposed to submersible service.

### SERIES 765

For Complete Information Request Publication **10.80**

- Weatherproof actuator housing approved for indoor and outdoor use
- Ductile iron body and disc with Nitrile seats
- Designed for fire protection services only
- All sizes available with a 1/2"/15mm NPT supply side tap
- Sizes from 2 -12"/65 - 300mm
- Pressure rated up to 365 psi/2517 kPa
- Sizes 2 - 6"/60.3 - 168.3 mm are VdS approved to 25 bar

Note: Sizes 10 -12" are FM Approved for services up to 300 psi/2068 kPa

- Rubber encapsulated disc provides superior corrosion resistance
- Can be installed in both horizontal or vertical positions
- Accepts a riser check kit
- Pressure rated up to 200 psi/  
1375 kPa for 250 psi/  
1725 kPa for FM
- Sizes from  
4–8"/100–200 mm

### SERIES 771H AND SERIES 771F

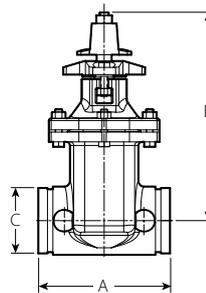

- Features three internal parts, making the valves easy to maintain
- Used when positive shut-off is required in a fire line and a quick visual indicator of open/closed position is required
- Pressure rated up to 250 psi/1725 kPa
- Sizes from 2½–12"/65–300 mm

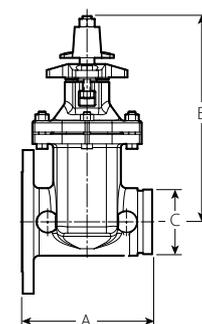

SERIES 771H OS&Y GATE VALVE

SERIES 771F OS&Y GATE VALVE

SERIES 772H NRS GATE VALE

SERIES 772F NRS GATE VALE

### SERIES 772H AND SERIES 772F

- Features three internal parts, making the valves easy to maintain
- Used for shut-off service where the valve is operated remotely
- Pressure rated up to 250 psi/1725 kPa
- Sizes from 2½–12"/65–300 mm

## FireLock Residential Zone Control Riser Module

### SERIES 247

For Complete Information  
Request Publication 30.83

### DIMENSIONS

1 – 2”/25 – 50 mm Nominal Sizes

(Valves shown above in the “test” position.  
Shown with Pressure Relief Valve Kit Installed)

- Compact design is easy to install in zoned wet sprinkler systems or on system risers
- Includes the module body integrated with a shut off valve, test and drain valve combination with different orifice sizes, a UL Listed and FM Approved flow switch, and a pressure gauge
- Available with grooved ends for easy installation in the horizontal or vertical up-flow positions
- Pressure rated up to 300 psi/ 2065 kPa for UL and ULC and 365psi/2517kPa for FM
- Optional pressure relief valve kit is available. Pressure relief configuration is FM Approved and UL and ULC Listed for working pressures up to 175psi/1200 kPa.
- Sizes from 1 – 2”/25 – 50 mm

SERIES 720 GROOVED ENDS

SERIES 720 THREADED ENDS

SERIES 720 WITH PRESSURE RELIEF VALVE

- Incorporates the test function and rapid drain function for wet sprinkler systems into a single unit
- Constructed of corrosion resistant bronze
- Available with either NPT, BSPT female threaded ends or with grooved ends
- K5.6/8.1 S.I. orifice is factory fitted (optional K8.0/11.5 S.I. orifice available upon request)
- Can be supplied with a pressure gauge port tapping
- Pressure rated up to 300 psi/2065 kPa
- Sizes from 1¼–2"32–50 mm for grooved end
- Sizes from 1–2"25–50 mm for threaded end

## Fire Pump Test Meter

### SERIES 735

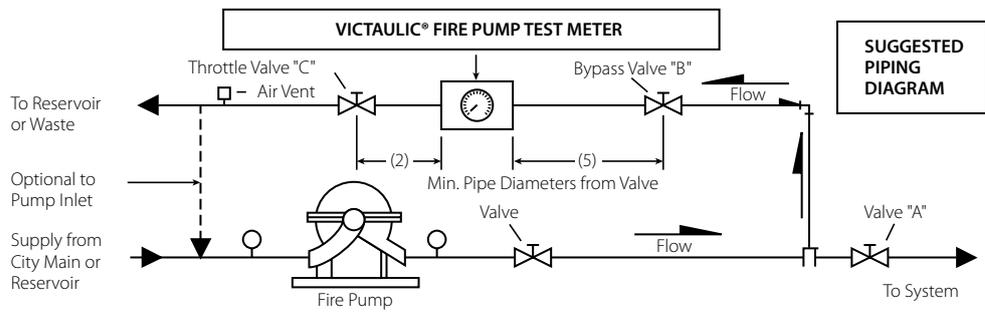

For Complete Information  
Request Publication 10.11

- Provides accurate measurements of pump performance
- Model "L" Pressure rated up to 175 psi/1200 kPa
- Model "S" Pressure rated up to 500 psi/3450 kPa
- Sizes from 2½–12"/65–300 mm

# FireLock Automatic Devices and Accessories

Victaulic continues to push the envelope of product development. FireLock NXT devices offer another leap forward in valve design and operation. Featuring a lower operating pressure and ultra-fast trip time, due to the elimination of the air-to-water differential, FireLock NXT devices deliver greater operational reliability and are easier to install, service and maintain. In addition, the compact trim and diaphragm design reduces the valve's center-to-back take out distance up to a full 7"/178mm when compared with competitive valves.

FireLock NXT® Dry System Check Valve†  
SERIES 768, PG. 7-3

FireLock NXT Deluge System Check Valve†  
SERIES 769, PG. 7-4

FireLock NXT Preaction System Check Valve†  
SERIES 769, PGS. 7-5–7-7

FireLock NXT Alternate Wet/Dry System Check Valve†  
(available in Europe only)  
SERIES 764, PG. 7-8

FireLock Alarm Check Valve  
SERIES 751, PG. 7-10

FireLock European Alarm Check Valve Station  
SERIES 751, PG. 7-11

FireLock Fire-Pac  
SERIES 745, PG. 7-12–7-13

† Shown with Vic®-Quick riser recommended trim configuration.

# FireLock Automatic Devices and Accessories

The innovative design of the new FireLock NXT line went beyond the valve itself. To reduce the footprint required for the trim to the bare minimum, trim components were redesigned to optimize performance and save space.

The low pressure actuator used on FireLock NXT devices eliminates the air-to-water differential. FireLock NXT valves feature a single set point of 13psi/90kPa for water supply systems up to 300psi/2065kPa.

The 3-in-1 device combines a check valve, a strainer and a restrictor into a single unit.

The air feed manifold was specifically designed to reduce the room needed for this component while improving performance.

## Accessories

### STANDARD, PG. 7-13

- Series 7C7 Compressor Package
- Series 776 Low Pressure Actuator
- Series 753-E Solenoid Actuator
- Series 798 Double Pneumatic Actuator
- Series 767 Electric/Pneumatic Actuator
- Series 748 Ball Check Valve
- Series 729 Ball Drip Assembly
- Series 755 Manual Pull Station
- Series 749 Auto Drain Assembly

### OPTIONAL, PG. 7-13

- Series 752 Retard Chamber
- Series 760 Water Motor Alarm
- Drain Connection Kit
- Series 746 Dry Accelerator
- Series 746-LPA Dry Accelerator
- Series 757/757P Air Maintenance Trim Assembly
- Series 75-D Water Column Component Drain Kit
- Series 75-B Supplemental Alarm Kit

### ELECTRICAL, PG. 7-13

- Supervisory Switches
- Alarm Pressure Switches

## PRODUCTS

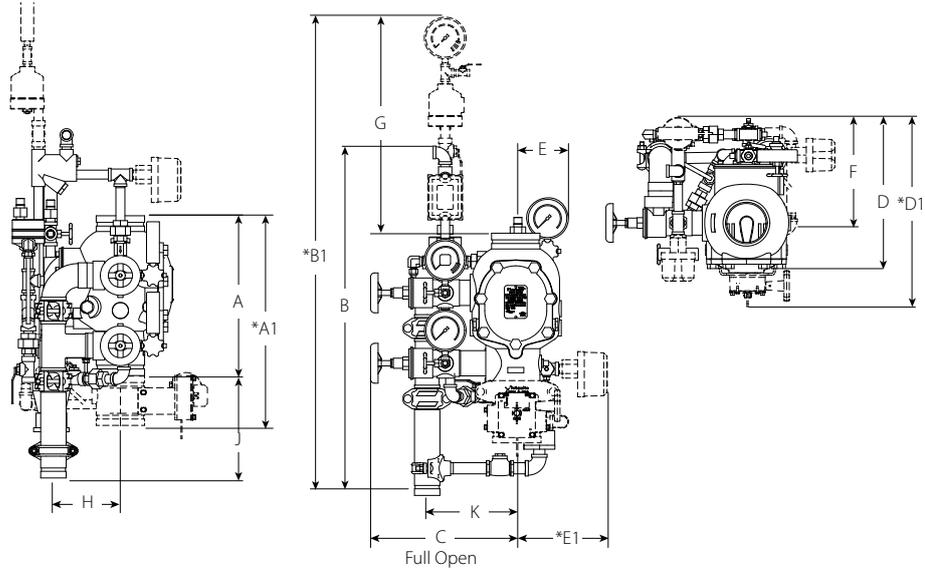

- 3-1 Couplings
- 4-1 Fittings
- 5-1 Hole Cut Piping System
- 6-1 Valves and Accessories
- 7-1 FireLock Automatic Devices and Accessories**
- 8-1 FireLock Automatic Sprinklers
- 9-1 Specialty Products
- 10-1 Pipe Preparation Tools
- 11-1 Product Index

- Vic-Quick Riser speeds installation, see pg. 7-9
- Includes control valves, pressure switches, and drain kit
- Single set point of 13psi/90kPa of air allows for a smaller compressor and easier set-up
- Low differential, latched clapper valve that separates system water from dry-pipe sprinkler systems
- Available bare, pretrimmed, as a Vic-Quick riser or in a Series 745 FireLock Fire-Pac cabinet, pg. 7-13
- When the system air pressure is released, the decreasing air pressure activates the low pressure actuator and releases the latch mechanism, which allows the clapper to open
- For available accessories and actuators, see pg. 7-15
- Pressure rated up to 300psi/2065kPa
- Sizes from 1½–8"/40–200mm

\* Measurements denoted with an asterisk take optional equipment into account.

### IMPORTANT NOTES:

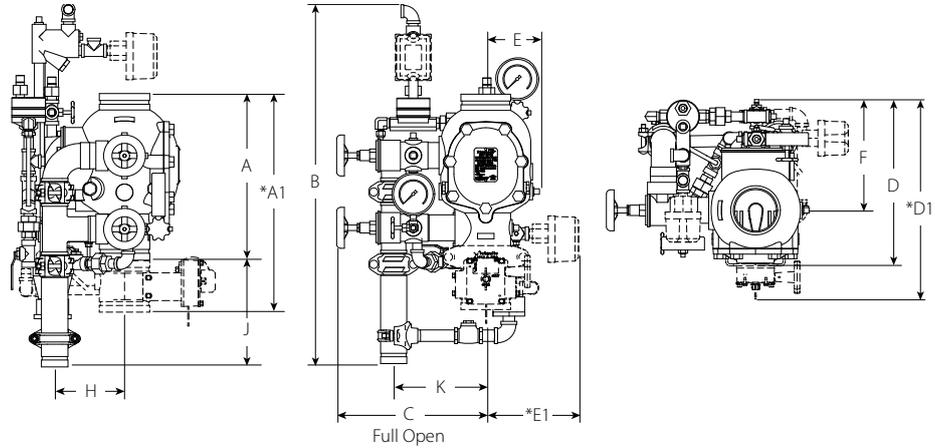

The "A" dimension coupling is not shown in order to clarify dimensional callouts. Components shown as dotted lines denote optional equipment. Optional drain connection kit is shown for reference and takeout dimensions. The drawings shown above reflect the dry pilot trim with Series 776 low pressure actuator.

- Vic-Quick Riser speeds installation, see pg. 7-9
- Includes control valves, pressure switches, and drain kit
- Single set point of 13 psi/90 kPa of air allows for a smaller compressor and easier set-up
- Low differential, latched clapper valve that separates system water from preaction pipe sprinkler systems
- Full trim packages for non-interlocked, single-interlocked and double-interlocked systems are available
- Available bare, pretrimmed, as a Vic-Quick riser or in a Series 745 FireLock Fire-Pac cabinet, pg. 7-13
- For available accessories and actuators, see pg. 7-15
- Pressure rated up to 300 psi/2065 kPa
- Sizes from 1½–8"/40–200 mm

\* Measurements denoted with an asterisk take optional equipment into account.

### IMPORTANT NOTES:

The drawings shown above reflect single-interlocked, pneumatic release trim with Series 776 Low-Pressure Actuator.

Available in the following trim configurations:

- Non-interlock
  - Pneumatic release
  - Electric release
- Single-interlock
  - Pneumatic release
  - Electric release
- Double-interlock
  - Pneumatic/electric release
  - Electric/pneumatic/electric release
  - Pneumatic/pneumatic release

Components shown as dotted lines denote optional equipment.

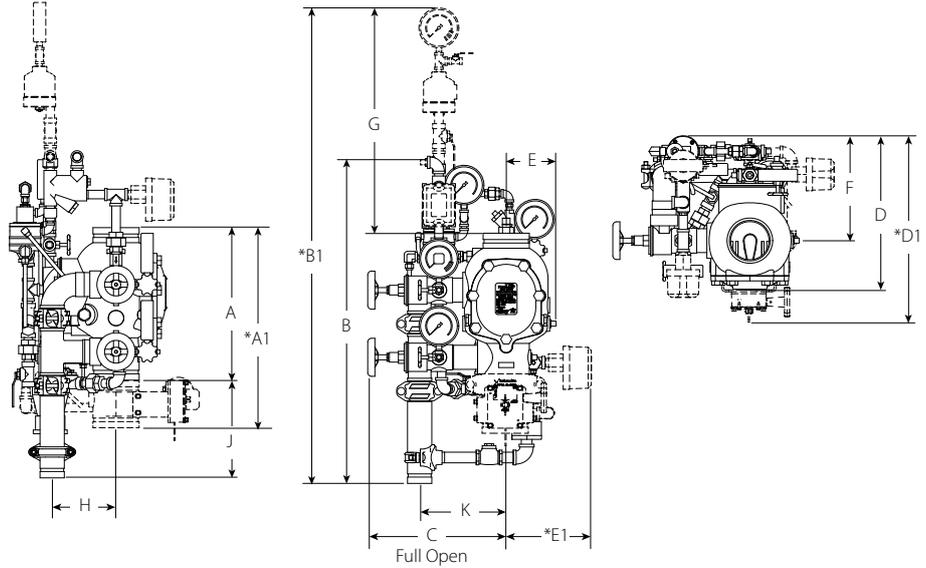

Optional drain connection kit is shown for reference and takeout dimensions.

NOTES:  
The "A" dimension coupling is not shown in order to clarify dimensional callouts.  
Components shown as dotted lines denote optional equipment.  
\* Measurements denoted with an asterisk take optional equipment into account.  
Optional drain connection kit is shown for reference and takeout dimensions.

- Valve can be field-converted from wet to dry quickly to accommodate changes in temperature
- Valve pre-trimmed to speed installation, see pg. 7-9
- Includes control valves, pressure switches, and drain kit
- Single set point of 13 psi/90 kPa of air allows for a smaller compressor and easier set-up
- Low differential, latched clapper valve that separates system water from dry-pipe sprinkler systems
- Available bare, pretrimmed, as a Vic-Quick riser, pg. 7-13
- When the system air pressure is released, the decreasing air pressure activates the low pressure actuator and releases the latch mechanism, which allows the clapper to open
- For available accessories and actuators, see pg. 7-15
- Pressure rated up to 300 psi/2065 kPa
- Sizes from 1½ – 8"/40 – 200 mm

# FireLock Automatic Devices and Accessories

## Vic-Quick Riser Trim Kit

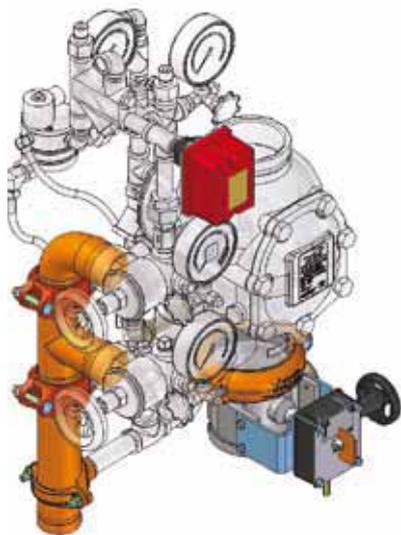

FireLock NXT valves can be specified with a Vic-Quick riser trim assembly. Valve installation time is reduced by up to 30% when the valve is pre-trimmed.

### VIC-QUICK RISERS INCLUDE:

- Shut off valve
- Pre-set pressure switches
- Drain kit for ease of installation.

The Vic-Quick Riser is available for all sizes of Series 768 dry, Series 769 deluge and Series 769 preaction FireLock NXT valves. The Vic-Quick riser can be installed into the system using Style 009 /009V FireLock EZ or Style 005 FireLock rigid couplings. Once the air lines and drains are connected the valves are ready for service.

# FireLock Automatic Sprinklers

Victaulic FireLock automatic sprinklers are designed to provide protection to almost any life/safety system. Victaulic FireLock automatic sprinklers are available with a wide range of finishes and temperature ratings and meet a variety of aesthetic and performance requirements, see pg. 8-4 for details.

Victaulic offers a complete line of accessories to meet almost any service need. Guards, shields, escutcheons, expansion and cover plates, are all designed to provide you with a single source for your next sprinkler project.

Delivery is another hallmark of Victaulic. Orders for dry sprinklers are usually delivered within five days of the receipt of the order, a standard that is unmatched in the industry.\*

Request publication 40.01 for a complete listing of sprinklers.

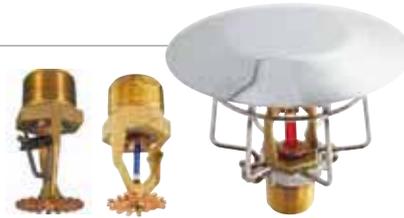

\* Delivery times may vary.

## Standard Commercial

Available in upright, pendent and sidewall configurations for most commercial applications.

**SEE INDIVIDUAL LISTINGS FOR SPECIFIC PRODUCT APPROVALS, PGS. 8-5-8-6**

## Storage

Victaulic offers a full range of FireLock Storage sprinklers including the LP-46 Low Pressure Storage Sprinkler, Ordinary Hazard, Extended Coverage and Early Suppression/Fast Response (ESFR) styles for large storage areas.

**SEE INDIVIDUAL LISTINGS FOR SPECIFIC PRODUCT APPROVALS, PG. 8-7**

## Extended Coverage

Our extended coverage sprinklers feature larger orifice sizes to provide added coverage when only normal water pressure is available. They are designed to produce a uniform, hemispherical spray pattern at 175 psi/1200 kPa and are designed for use in a variety of applications. Both standard and quick response models are available in a choice of finishes.

**SEE INDIVIDUAL LISTINGS FOR SPECIFIC PRODUCT APPROVALS, PG. 8-8**

## Specific Applications

The model V2502 sprinkler is specifically designed to address combustible concealed horizontal spaces and is UL Listed for use with steel or CPVC piping systems.

**SEE INDIVIDUAL LISTINGS FOR SPECIFIC PRODUCT APPROVALS, PG. 8-6**

# FireLock Automatic Sprinklers

Victaulic dry sprinklers are the fastest to market in the industry

Victaulic dry sprinklers can be customized to meet specific application requirements and can be provided in lengths to the nearest  $\frac{1}{4}$ "/6 mm. Industry standard lead time for customized sprinklers is three weeks, however Victaulic can turn customized dry sprinklers around in as little as five days.

**FOR MORE INFORMATION, SEE PGS.8-11–8-12**

- 8-1 FireLock Automatic Sprinklers**
- 9-1 Specialty Products
- 10-1 Pipe Preparation Tools
- 11-1 Product Index

## Residential

Our low profile quick response residential sprinklers offer an ideal combination of safety and aesthetics and a variety of finishes and deflector styles. They are designed to meet the requirements of NFPA 13D and 13R occupancies. Depending on available operating pressure and room configuration, these FireLock sprinklers can be used in a variety of room conditions, including sloped ceilings.

**SEE INDIVIDUAL LISTINGS FOR SPECIFIC PRODUCT APPROVALS, PG. 8-9**

## Decorative

Victaulic models V38 and V39 are concealed and available in a wide choice of standard and custom finishes. Installation is easy using a two-piece threaded mounting cup/cover plate with up to  $\frac{1}{2}$ "/13 mm adjustability.

**SEE INDIVIDUAL LISTINGS FOR SPECIFIC PRODUCT APPROVALS, PG. 8-10**

## Dry

Can be installed in wet or dry systems for areas exposed to freezing conditions. Designed with Belleville spring sealing mechanisms made of beryllium nickel. Features proprietary nickel Teflon\* coating option and stainless steel escutcheons hydrostatically at 500 psi/3450 kPa. Available custom-made on a 5-day turnaround. Available escutcheons include a flush, sleeve and skirt, extended and recessed option for pendent and horizontal sidewall sprinklers.

**SEE INDIVIDUAL LISTINGS FOR SPECIFIC PRODUCT APPROVALS, PGS. 8-11–8-12**

## Window Nozzle Sprinklers

Our V1001-V1013 window nozzle sprinklers provide a water curtain against windows or other openings. These nozzles feature a solid brass body, and 180° flat, fan-shaped coverage.

**SEE INDIVIDUAL LISTINGS FOR SPECIFIC PRODUCT APPROVALS, PG. 8-13**

† Teflon is a registered trademark of Dupont Corporation.

# FireLock Automatic Sprinklers

## Foam Nozzle Sprinklers

The model V26 Open Foam Nozzle works with various foam compounds—A.F.F.F., fluoro-protein, protein and alcohol-type foam liquids.

**SEE INDIVIDUAL LISTINGS FOR SPECIFIC PRODUCT APPROVALS, PG. 8-13**

## Open Spray Nozzles

Victaulic V12 Open Spray Nozzles are designed for directional spray applications in fixed fire protection systems. They are available in multiple orifice sizes and spray angles.

**SEE INDIVIDUAL LISTINGS FOR SPECIFIC PRODUCT APPROVALS, PG. 8-13**

## Special Coatings

### NICKEL-TEFLON\* COATING

Victaulic offers a UL Listed corrosion resistant proprietary Nickel-Teflon coating for select FireLock automatic sprinklers.

### WAX COATING

Victaulic sprinklers can be specially wax coated to ensure long life in potentially corrosive environments. Ask your Victaulic sales representative for further details.

*Plain Brass finished Victaulic Sprinkler tested for 30 days in 20% salt fog and then rinsed in room temperature water agitator for 15 minutes.*

*Proprietary Nickel-Teflon coated Victaulic Sprinkler tested for 30 days in 20% salt fog and then rinsed in room temperature water agitator for 15 minutes.*

\* Teflon is a registered trademark of Dupont Corporation.

\* UL Listed to 250psi, FM Approved to 175 psi.

§ For K-Factor when pressure is measured in Bar, multiply S.I. units by 10.0.

† Not all combinations of temperature ratings and wax finishes are Approved or Listed. Check specific submittals for combinations. V27 and V34 models are MEA (#62-99-E) and CSFM (#7690-0531.112) Approved.

# Approved for use on sloped ceilings.

\*\* Recessed pendent up to ½"/13 mm adjustment; For rooms 12 × 12 ft. to 20 × 20 ft./3.7 × 3.7 m to 6.1 × 6.1 m.

\*\*\* Recessed pendent up to ¼"/6 mm adjustment; For rooms 12 × 12 ft. to 18 × 18 ft./3.7 × 3.7 m to 5.5 × 5.5 m.

‡ Also available with Sealing Gasket for Clean Room Applications. Request publication 40.53.

All Victaulic sprinklers are available in British Standard Pipe Threads. Contact Victaulic for details.

# Specialty Products

For special fire protection applications, Victaulic delivers a variety of piping product solutions. From plain end HDPE, stainless steel and carbon steel, to grooved AWWA size ductile iron, carbon steel and stainless steel piping, whatever your need Victaulic has a full line of products to make the installation faster, easier and more economical.

## Pressfit® Piping Stainless Systems

The Pressfit system is a small diameter, quick-connect piping system solution that delivers speed, economy and reliability to building owners, contractors, and specifying engineers. Pressfit delivers real on-the-job pipe joining advantages to fitters and installers – benefits that you won't find in standard threaded, welded or flanged systems.

The Pressfit stainless system is ideal for a wide variety of applications requiring the corrosion-resistant properties of stainless steel. Pressfit integrates well with larger stainless steel piping systems, especially those designed with Victaulic grooved end products.

Pressfit products are also offered in carbon steel for fire protection systems. Pressfit products are not designed for use on metric size piping systems.

For Complete Information Request Publications [18.01](#) and [18.02](#)

**Note:** Pressfit products are available for imperial pipe sizes only.

## Plain End Piping Systems

The Victaulic plain end piping method is ideal for maintenance and repairs as well as new system installation. Roust-A-Bout® couplings and plain end fittings are UL and ULC Listed for fire protection services.

Victaulic plain end couplings are primarily designed for use on standard weight steel pipe (Schedule 40), but may be used on lightwall steel or other metallic pipe such as aluminum or stainless steel. No special pipe end preparation is necessary.

For Complete Information Request Publications [14.02](#) and [14.04](#)

## HDPE Piping Systems

FM Approved for underground services, our HDPE couplings and flange adapters create a joint where the working pressure of the coupling meets or exceeds the rating of the pipe. Gripping teeth bite into the entire pipe circumference, and the joint is made secure by tightening down just four bolts and nuts.

For Complete Information Request Publications [19.02](#) – [19.04](#)

# Specialty Products

Victaulic provides a variety of joining systems and materials for almost any fire protection application. Victaulic products are designed to meet the needs of the most demanding systems.

For the most up-to-date information on our specialty line of products please visit the Victaulic web site at [www.victaulic.com](http://www.victaulic.com).

## Copper Piping Systems

Grooved copper couplings, fittings and flange adapters designed for large diameter copper tubing, 2–8"/50–200mm. Table A and Y.

Copper couplings and fittings are UL/ULC Listed for fire protection services.

For Complete Information Request Publications **22.01 – 22.13**

DIN Standard DIN 1786 and British Standard Table X and Y, see Submittal Publication **22.11**

For Australian Standard Tables A, B and D, see Submittal Publication **22.10**

## Stainless Steel Piping Systems

For fast, economical joining of Schedule 5, 10, 20, and 40 stainless steel pipe, you will find a complete line of roll or cut grooved stainless mechanical pipe joining products from Victaulic.

For Complete Information Request Publications **17.03 – 17.25**

## AWWA Piping Systems for North America

Also ideal for underground services, our line of AWWA fittings and couplings easily transition from AWWA to IPS size pipe, and create secure joints with just two bolts versus the eight found in flanged systems.

AWWA fittings are UL/ULC Listed and FM Approved for underground fire protection services.

For Complete Information Request Publications **23.01 – 23.09**

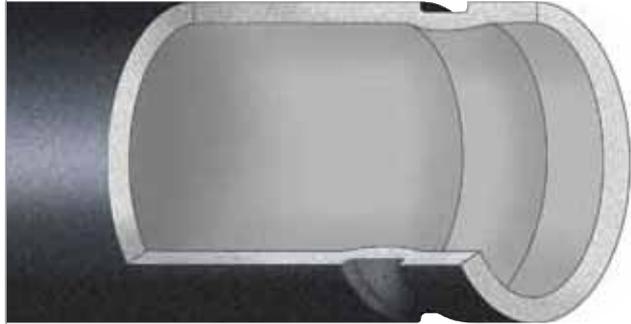

# Pipe Preparation

## Roll Groove

Victaulic was the first to develop roll grooving tools in the 1950's and continues to lead the industry in developing tools that make the job faster and easier to install.

Victaulic was the first company to receive approval for use of grooved pipe on fire protection systems.

Victaulic offers a variety of tools for pipe preparation, cutting holes, in-place repairs and system maintenance.

Roll groove shown on Schedule 40 steel pipe. The small dimple created on the interior pipe wall does not significantly affect pressure or flow.

VE12

### VE12 GROOVE IN-PLACE

- For manual grooving of Schedule 5, 10 and 40 steel; stainless steel; aluminum and PVC pipe
- Enhanced tracking rolls allow bi-directional grooving
- Roll grooves  $\frac{3}{4}$ –2"/20–50mm pipe†

**Power Requirements:** None

**Weight:** 17 lbs./8kg

VE26

### VE26 GROOVE IN-PLACE

- Repair and retrofit existing lightwall steel, Schedule 40 steel, stainless steel, PVC, and aluminum
- Patented enhanced tracking rolls allow bi-directional grooving
- Model VE26C handles copper tubing (CTS) Types K, L, M and DWV plus British, DIN, and Australian Standard copper
- Model VE26SS grooves Schedule 5 and 10 stainless steel
- Optional power drive adapter kit available to alternately groove pipe using a Ridgid\* 300 power drive or VPD752
- Roll grooves 2–6"/50–150mm pipe†

**Power Requirements:** None

**Weight:** 22 lbs./10kg

### VE26/46 Power Drive Kit

The VE26/46 power drive kit is available to allow both tools to be directly mounted to either a Victaulic VPD752 or Ridgid\* 300 Power Drive.

VE46

### VE46 GROOVE IN-PLACE

- Designed for manually roll grooving Schedule 40 steel, aluminum, stainless steel and PVC pipe and Schedule 80 PVC pipe
- Patented enhanced tracking rolls allow bi-directional grooving and reduce pipe "walk-off"
- Optional power drive adapter kit available to alternately groove pipe using a Ridgid\* 300 power drive or VPD752
- Roll grooves  $3\frac{1}{2}$ –6"/90–150mm pipe†

**Power Requirements:** None

**Weight:** 28 lbs./13kg

VE226

### VE226 portable groover

- Mounts to a Victaulic VPD752 or Ridgid\* 300 power drive
- Optional alternate bases available
- Tool is operated using a standard  $\frac{3}{8}$ "/9.5 mm square ratchet drive (not included)
- Available in six models for steel (and other IPS) pipe, copper tubing and stainless steel
- Roll grooves  $\frac{3}{4}$ –6"/20–150mm pipe†

**Drive Requirements:** Fits Victaulic VPD752 or Ridgid 300 power drives.

Optional bases for Ridgid 535, 1224, 1822, and Oster 310 available.

Contact Victaulic for others.

**Weight:** 37 lbs./17 kg

† Refer to Roll Grooving Tool Ratings chart on pg. 11-8.

\* Ridgid is a registered trademark of the Ridge Tool Company.

## Field Fabrication

For Complete Information  
Request Publication 24.01

VE106

### VE106 GROOVE-N-GO

- Mobile light-duty roll grooving tool with an integral motor/drive unit mounted to portable hand truck
- $\frac{3}{8}$ "/9.5 mm square ratchet drive for operation (standard)
- Patented enhanced tracking rolls reduce pipe "walk-off"
- Completely self-contained unit with an integral motor, safety foot switch and power plug
- Roll grooves  $1\frac{1}{4}$ – $6\frac{1}{32}$ –150 mm pipe†

**Power Requirements:** VE106 is provided with 110volt, 15amp power.

**Weight:** 140 lbs./64 kg

**Optional Accessories:** Additional rolls/shafts are available for copper, lightwall stainless steel, and EndSeal (ES) grooving.

VE270FSD

### VE270FSD

- Completely self-contained unit with integral gear motor, safety guards, safety foot switch and power cord/plug
- Equipped with a unique pivot arm design, making roll changing quick and easy, without removing shafts
- Patented enhanced tracking rolls reduce pipe "walk-off"
- Roll grooves  $\frac{3}{4}$ – $12\frac{1}{20}$ –300 mm pipe†

**Drive Requirements:** Self-contained

**Power Requirements:** VE270FSD is provided with 110volt, 15amp power.

**Weight:** 340 lbs./154 kg

**Optional Rolls:** Carbon steel Schedules 5, 10, 20, and 40; copper rolls for type K, L, M and DWV; and stainless steel Rx rolls for Schedules 5S-10-10S.

**Optional Accessories:** An optional pipe stabilizer for 8– $12\frac{1}{200}$ –300 mm pipe is available.

VE272SFS

### VE272SFS

- Portable roll groover mounts easily to the Victaulic VPD752 or Ridgid 300 power drive
- Hand pump operation with a unique pivot arm design reduces handle effort
- Patented enhanced tracking rolls reduce pipe "walk-off"
- Roll grooves  $\frac{3}{4}$ – $12\frac{1}{20}$ –300 mm pipe†

**Power Requirements:** Victaulic VPD752 or Ridgid 300 power drive

**Weight:** 184 lbs./84 kg

**Optional Rolls:** Optional rolls are available for copper tubing; Schedule 5S, 10S, and 10 stainless steel pipe; and EndSeal (ES) grooving.

VE416FSD

### VE416FSD

- For field roll grooving of 2– $16\frac{1}{50}$ –400 mm standard wall pipe, lightwall steel pipe, as well as aluminum, stainless and PVC plastic pipe
- Equipped with a pipe stabilizer for 6– $16\frac{1}{150}$ –400 mm pipe sizes to control pipe sway
- Groove depth adjuster provides precise groove dimensions and allows for easy adjustment for initial groove diameter
- Completely self-contained units with integral gear motors, safety foot switch and power cord/plug
- Roll grooves 2– $16\frac{1}{50}$ –400 mm pipe†

**Power Requirements:** 110volt, 15amp for integral gear motor (220volt, 8amp model available)

**Weight:** 340 lbs./154 kg

**Optional Rolls:** Optional rolls are available for drawn copper tubing; Schedule 80 PVC pipe; stainless steel Rx Schedules 5S, 10 and 10S; and EndSeal (ES) grooving. Roll sets also available for 14– $16\frac{1}{350}$ –400 mm std. wall carbon steel pipe for use with the AGS system.

† Refer to Roll Grooving Tool Ratings chart on pg. 10-8.

# Pipe Preparation

## Plant/Shop Fabrication

For Complete Information Request Publication 24.01

VE268

### VE268

- Designed for fabrication shop roll grooving
- The fully-motorized, semi-automatic, electrohydraulic tool comes complete with safety guards and safety foot switch
- Equipped with a unique pivot arm design, making roll changes quick and easy, without removing shafts
- Patented enhanced tracking rolls reduce pipe "walk-off"
- Roll grooves  $\frac{3}{4}$ –12"/20–300mm pipe<sup>†</sup>

**Drive Requirements:** Self-contained

**Weight:** 735lbs./333kg

**Optional Rolls:** Optional rolls are available for carbon steel Schedules 5, 10, and 40; copper rolls for type K, L, M and DWV; and stainless steel Rx rolls for Schedules 5S, 10, and 10S.

**Optional Accessories:** An optional pipe stabilizer for 8–12"/200–300mm pipe is available.

## Pressfit Tool

For Complete Information Request Publication 24.01

PFT505

### PFT505\*

- The Pressfit System requires a Pressfit tool designed for securing Pressfit products onto pipe
- Tool packages include the actual pressing tool and any customer specified press jaws
- Jaws are available separately for rental or purchase
- Pressfit tool is designed for industrial and trade use only

**Capacity:**  $\frac{1}{2}$ –2"/15–50mm IPS Schedule 5 steel and stainless steel pipe

**Power Requirements:** 110volt, 60cycle, 6.5amp power

**Accessories:**  $\frac{1}{2}$ "/15mm,  $\frac{3}{4}$ "/20mm, 1"/25mm, 1 $\frac{1}{2}$ "/40mm and 2"/50mm jaws

**Note:** PFT505 and PFT509 components are not interchangeable

PFT509

### PFT509\*

- The Pressfit System requires a Pressfit tool designed for securing Pressfit products onto pipe
- Tool packages include the actual pressing tool, two (2) batteries and a charger, carrying case, and  $\frac{1}{2}$ "/15mm,  $\frac{3}{4}$ "/20mm, 1"/25mm and 1 $\frac{1}{2}$ "/40mm
- Jaws are available separately for purchase
- Pressfit tool is designed for industrial and trade use only
- Pressfit tool is battery powered and requires a 12V battery charger

**Capacity:**  $\frac{1}{2}$ –1 $\frac{1}{2}$ "/15–40mm IPS Schedule 5 steel and stainless steel pipe

**Power Requirements:** 110volt, 60cycle, 6.5amp power

**Note:** PFT505 and PFT509 components are not interchangeable

<sup>†</sup> Refer to Roll Grooving Tool Ratings chart on pg.10-8.

\* Available in North America only.

# Pipe Preparation

## Hole Cutting Tools

For Complete Information  
Request Publication 24.01

HCT908

### HCT908

- One-piece hole cutting tool designed to cut holes up to 4 ½"/120mm in carbon and stainless steel pipe
- Designed for use with Mechanical-T and Vic-Let outlets

**Capacity:** ½–4"/15–100mm pipe, 1–4 ½"/25–120 mm holes for Mechanical-T and Vic-Let

**Power Requirements:** 110volt, 1 phase, 60Hz, 7.0amp power

**Weight:** 23lbs./10kg

VHCT900

### VHCT900

- Three-piece hole cutting tool designed to cut holes up to 3 ½"/90 mm in diameter for Mechanical-T and Vic-Let outlets
- Base unit clamps quickly onto the pipe in vertical, horizontal or overhead positions
- Heavy-duty drill mounts to the alignment guides and a manual feed assembly provides uniform pressure on the saw for maximum cutting efficiency

**Capacity:** 1¼–8"/32–200mm pipe, 1–3 ½"/25–90mm holes for Mechanical-T and Vic-Let outlets

**Power Requirements:** VHCT900 is provided with grounded 120volt, 1 phase, 60Hz, 10amp power.

**Weight:** 36lbs./16kg

**Accessories:** Extended chain for 10–24"/250–600mm pipe

### VIC-TAP II

- Hole cutting tool designed for use with Style 931 Vic-Tap II Mechanical-T unit for tapping into steel pipe systems under pressures up to 500psi/3450kPa

**Capacity:** Vic-Tap II 4–8"/100–200mm Run × 2 ½"/65 mm (IPS) Outlet

**Power Requirements:** 115volt, 1 phase, 60Hz, 7.5amp

**Weight:**

(A) Drill guide base 15lbs./6.8kg

(B) Drill motor and feed assembly, total wgt. 16lbs./7.3kg

(C) Style 931/Valve unit, 12lb./5.4kg – 15lb./6.8kg, depending upon size

**Hole Size:** 2 ¾"/60.5mm

VPD752

For Complete Information  
Request Publication 24.01

- Can be used as the power drive unit for the VE26, VE46, VE226 and VE272SFS roll grooving tools, provided the tool is equipped with the correct base plate
- Operated with a safety foot switch

**Capacity:** See appropriate tool

**Power Requirements:** VPD752 is provided with 115 volts, 15 amp power, 50/60 Hz.

**Weight:** 140 lbs./634 kg

## Adjustable Pipe Stand

VAPS112

For Complete Information  
Request Publication 24.01

- Designed for supporting pipe to be roll grooved
- Four legged portable self-standing unit permits free pipe rotation and traversing on ball transfers
- Turnstile design allows pipe to be spun around for grooving of both pipe ends without dismounting pipe from stand

**Capacity:** ¾–12"/20–300 mm IPS pipe

**Load Rating:** 1075 lbs./490 kg

**Vertical Stroke:** 14½"/368 mm for adjusting rod, 8½"/216 mm leg adjustment, 23"/584 mm

**Minimum Pipe Height from Floor:**

23"/584 mm on 12"/300 mm pipe

21"/533 mm on 1"/25 mm pipe

**Weight:** 190 lbs./86 kg

**Handle Effort Required to Raise 1075 lbs./490 kg Load:** 50 lbs./23 kg maximum

## Adjustable Pipe Stand

VAPS224

For Complete Information  
Request Publication 24.01

- Designed specifically for supporting pipe to be roll grooved
- Self-standing heavy-duty unit permits free pipe rotation and traversing on ball transfers
- Ball transfers are mounted in a manner permitting use of pipe slings
- Turnstile design allows pipe to be spun around for grooving of both pipe ends without dismounting pipe from stand

**Capacity:** 2–24"/50–600 mm IPS pipe

**Load Rating:** 1800 lbs./816 kg

**Vertical Stroke:** 23"/584 mm

**Minimum Pipe Height from Floor:** 13"/325 mm on 24"/600 mm IPS pipe

**Maximum Pipe Height from Floor:** 38"/965 mm on 2"/50 mm IPS pipe

**Weight:** 260 lbs./118 kg

**Handle Effort Required to Raise 1800 lbs./817 kg Load:** 50 lbs./23 kg maximum

## Pipe Diameter Tape

For Complete Information  
Request Publication 24.01

- Pocket-sized steel tapes are available for taking circumferential measurements, marked in 1/100<sup>ths</sup> of an inch increments
- Tapes may be used for measuring ¾–22"/20–550 mm pipe O.D. at the base of the groove (the "C" diameter)
- Tapes are notched on the lead end to allow proper overlap within the groove for more accurate measurement

# Pipe Preparation

## Vic-Easy® Roll Grooving Tool Ratings

### (MAXIMUM CAPACITY)

Victaulic Vic-Easy roll grooving tools are designed to cold form grooves into the specified pipe to meet piping standards and groove dimensions specified in Victaulic Groove Specifications for each type of pipe.

These tools are designed for roll grooving pipe. To accomplish this function requires some dexterity and mechanical skills, as well as sound safety habits. Although tools are manufactured for safe dependable operation, it is impossible to anticipate those combinations of circumstances which could result in an accident. The operator is cautioned to always practice "Safety First" during each phase of use, including setup and maintenance of these units.

Read and understand the Tool Operating and Maintenance Instruction Manual provided with each tool before operating or performing maintenance on tools. Become familiar with the tool's operations, applications and limitations. Be particularly aware of its specific hazards.

Note: Vic-Easy tools and rolls shown on this chart will produce grooves in accordance with Victaulic Roll Groove Dimension charts and to ANSI/AWWA C-606 standards.

@ Does not apply to 6"/150mm Schedule 40 size.

\* 2"/50mm Schedule 80 with RP rolls.

# Rx Rolls – "Rx" is the Victaulic part code designator for grooving roll sets specifically designed for roll grooving lightwall stainless steel pipe.

‡ Alternate units are available for European Standard (EN) 1057 and Australian Standard Copper.

§ Standard Rolls – This is the Victaulic designation for grooving roll sets used primarily for steel pipe. Also used for Schedule 40S stainless steel pipe.

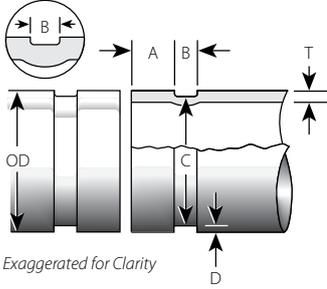

\*\* Standard Wall (0.375"/9.5mm)

# Pipe Preparation

## Groove Dimensions

### ROLL GROOVE SPECIFICATIONS NOTES

For Complete Information Request Publication 25.01

#### GROOVE DIMENSION NOTES:

##### Column 1: Nominal IPS Pipe Size

##### Column 2: IPS Pipe Outside Diameter

The average pipe outside diameter must not vary from the specifications listed in the tables on the following pages. Maximum allowable pipe ovality should not vary by more than 1%. Greater variations between the major and minor diameters will result in difficult coupling assembly. For IPS pipe, the maximum allowable tolerance from square-cut pipe ends is 0.030"/0.8 mm for 3/4" - 3 1/2"/20 - 90 mm sizes; 0.045"/1.1 mm for 4" - 6"/100 - 150 mm sizes; and 0.060"/1.5 mm for 8"/200 mm and larger sizes. This is measured from the true square line. Any internal and external weld beads or seams must be ground flush to the pipe surface. The inside diameter of the pipe end must be cleaned to remove coarse scale, dirt, and other foreign material that might interfere with or damage grooving rolls.

##### Column 3: Gasket Seat "A" Dimension

The "A" dimension, or the distance from the pipe end to the groove, identifies the gasket seating area. This area must be free from indentations, projections (including weld seams), and roll marks from the pipe end to the groove to ensure a leak-tight seal for the gasket. All oil, grease, and dirt must be removed.

##### Column 4: Groove Width "B" Dimension

The "B" dimension, or groove width, controls expansion, contraction, and angular deflection of flexible couplings by the distance it is located from the pipe and its width in relation to the coupling housings' "key" width.

##### Column 5: Groove Outside Diameter "C" Dimension

The "C" dimension is the proper diameter at the base of the groove. This dimension must be within the diameter's tolerance and concentric with the OD for proper coupling fit. The groove must be of uniform depth for the entire pipe circumference.

##### Column 6: Groove Depth "D" Dimension

The "D" dimension is the normal depth of the groove and is a reference for a "trial groove" only. Variations in pipe OD affect this dimension and must be altered, if necessary, to keep the "C" dimension within tolerance. This groove must conform to the "C" dimension described above.

##### Column 7: Minimum Allowable Wall Thickness "T" Dimension

The "T" dimension is the lightest grade (minimum, nominal wall thickness) of pipe that is suitable for cut or roll grooving. Pipe that is less than the minimum, nominal wall thickness for cut grooving may be roll grooved or adapted for Victaulic couplings by using Vic-Ring adapters. Vic-Ring adapters can be used in the following situations (contact Victaulic Company for details):

- When the pipe is less than the minimum, nominal wall thickness suitable for roll grooving
- When the pipe outside diameter is too large to roll or cut groove
- When the pipe is used in abrasive services

##### Column 8: Maximum Allowable Pipe-End Flare Diameter "F" Dimension (Standard Roll Groove Only)

Maximum allowable pipe-end flare diameter is measured at the extreme pipe-end diameter.

@ Always refer to the I-100 handbook for current grooving specifications.

† On roll grooved pipe, Allowable Pipe End Separation and Deflection from center line will be 1/2 values listed for cut grooved pipe.

#### IMPORTANT NOTES:

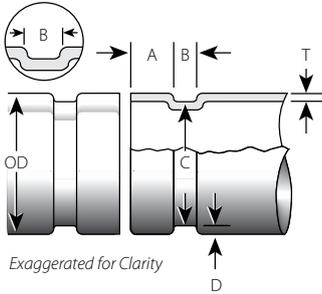

Coatings applied to the interior surfaces, including bolt pad mating surfaces, of our grooved and bolted plain end couplings should not exceed 0.010"/0.25 mm. Also, the coating thickness applied to the gasket seating surface and within the groove on the pipe exterior should not exceed 0.010"/0.25 mm.

@ Always refer to the I-600 handbook for current grooving specifications.

#### GROOVE DIMENSION NOTES:

**Column 1: Nominal ASTM B-88 drawn copper tubing size as indicated in the chart heading**

#### Column 2: Outside Diameter

The outside diameter of roll grooved tubing shall not vary more than the tolerance listed. The maximum allowable tolerance from square cut ends is 0.030"/0.8 mm for 2–3"/50–80 mm; 0.045"/1.1 mm for 4–6"/100–150 mm, measured from true square line.

#### Column 3: Gasket Seat

The tubing surface shall be free from indentations, roll marks, and projections from the end of the tubing to the groove, to provide a leak-tight seat for the gasket. All loose scales, dirt, chips and grease must be removed.

#### Column 4: Groove Width

Bottom of groove to be free of loose dirt, chips and scale that may interfere with proper coupling assembly.

#### Column 5: Groove Outside Diameter

The groove must be uniform depth for the entire tubing circumference. Groove must be maintained within the "C" diameter tolerance listed.

#### Column 6: Groove Depth

For reference only. Groove must conform to the groove diameter "C" listed.

#### Column 7: Minimum Allowable Wall Thickness "T" Dimension

ASTM B-306 drain waste and vent (DWV) is minimum wall thickness copper tubing which may be roll grooved. In Australia, Victaulic products can connect CN 50, Tables A, B and D pipe.

#### Column 8: Maximum Allowable End Flare Diameter

Measured at the most extreme tubing end diameter.

We warrant all products to be free from defects in materials and workmanship under normal conditions of use and service. Our obligation under this warranty is limited to repairing or replacing at our option at our factory any product which shall within one year after delivery to original buyer be returned with transportation charges prepaid, and which our examination shall show to our satisfaction to have been defective.

THIS WARRANTY IS MADE EXPRESSLY IN LIEU OF ANY OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. THE BUYER'S SOLE AND EXCLUSIVE REMEDY SHALL BE FOR THE REPAIR OR REPLACEMENT OF DEFECTIVE PRODUCTS AS PROVIDED HEREIN. THE BUYER AGREES THAT NO OTHER REMEDY (INCLUDING, BUT NOT LIMITED TO, INCIDENTAL OR CONSEQUENTIAL DAMAGES FOR LOST PROFITS, LOST SALES, INJURY TO PERSON OR PROPERTY OR ANY OTHER INCIDENTAL OR CONSEQUENTIAL LOSS) SHALL BE AVAILABLE TO HIM.

Victaulic Company neither assumes nor authorizes any person to assume for it any other liability in connection with the sale of such products.

**This warranty shall not apply to any product which has been subject to misuse, negligence or accident, which has been repaired or altered in any manner outside of the Victaulic factory or which has been used in a manner contrary to instructions or recommendations provided by Victaulic Company. Victaulic Company shall not be responsible for design errors due to inaccurate or incomplete information supplied by Buyer or its representatives.**

Items purchased by Victaulic and resold will have the original equipment manufacturer's warranty extended to Victaulic customers.

*Effective August 4, 2008*

All products shall be installed in accordance with current Victaulic installation/assembly instructions. Victaulic Company reserves the right to change product specifications, designs and standard equipment without notice and without incurring obligations.

# Applications

## Piping. Systems. Solutions.

Victaulic offers a broad, innovative fire protection product line that has been designed to meet tight timeline challenges and expectations of world-class quality and performance.

This commitment to quality and performance, bundled with prompt product delivery, superior customer and engineering support, and ease of installation and maintenance make Victaulic products the preferred choice for fire protection professionals worldwide.

The Victaulic FireLock NXT valve line saves space and requires less room for installation than most competitive valves.

Victaulic valves have a single set point that allow for a smaller compressor and easier initial set-up.

Victaulic provides a complete line of valves, couplings, fittings and specialty products for all sizes of fire pumps.

A full line of fire protection devices for alarm, dry, deluge and preaction sprinkler systems.

Victaulic FireLock sprinklers are designed to protect a wide range of spaces including large storage areas.

The new installation-ready FireLock EZ coupling reduces the time required to install systems by up to 60%.
